Good Practices For Managing A Safe Chemical Laboratory Part 1: People And Human Resources

By **Richard C. Wedlich and Kurt L. Moyer** Jan 26, 2021 8:00 am EST

INTRODUCTION The present article should interest those who must manage a laboratory facility and keep it safe. This forms a very wide spectrum of people. Persons in the Lab Manager position, whether they actively pursued it or got tossed in, hail from a variety of backgrounds including University Research labs, Industrial R&D, Human Resources, Safety and Quality Assurance. We have not written specifically for the safety expert. Neither have we written with an eye mainly towards the regulatory expert. To be sure, Lab Managers, *per se*, must have considerable expertise...
