Digital Data #2: Digital Search Challenges - IVT BLOG

Tim Sandle

By **Apr 27, 2021 7:00 am EDT**

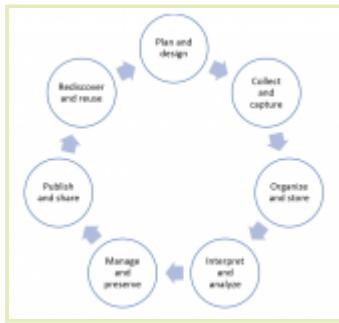

Figure 1: A digital data search cycle This article looks at the challenges involved with data searching and data capture, and provides links to several database of interest to those working in the life sciences field. Digital searches: The challenges Undertaking digital research is not without challenges. Challenges include (1): Sampling bias: It can sometimes be hard to assess the representativeness of online samples and, therefore, the generalizability of results. Validity of data: Accurate data are vital for research. The potential anonymity of the online environment raises concerns...
