The Benefits Of Utilizing A Spectrum Of Importance In Industry

Daniel O'Regan and Cliff Campbell

By

Jun 25, 2020 7:00 am EDT

ABSTRACT This paper highlights the practical benefits to the industry, of adopting the concept of the 'Spectrum of Importance' (SOFI) as proposed by O'Keeffe et al (1) which presented an alternate approach to understanding and prioritizing process parameters. Their approach represented a move away from the current binary critical/non-critical one that is widely used by many companies today; instead, it involved positioning process parameters (and material attributes also) on a spectrum which reflects the relative importance of those parameters and attributes in terms of...
