A Risk-Based Revalidation Approach For Medical Devices

Yeong-Lin Chen

By

Aug 26, 2021 7:00 am EDT

ABSTRACTProcess validation approach for medical device industry is diverse, which is due to a wide range of technologies and applications. Process revalidation approach is even more uncertain while compared with initial validation. In medical device industry, manufacturing change-induced revalidation is validation professionals' everyday activity so it will be burdensome if not efficiently managed. This article proposes a risk-based revalidation approach with a simple and pragmatic risk assessment method for mechanical-type medical device manufacturing. Use the risk assessment output in conjunction...
